

Introducing the **ACCURATE ORAL FLUID DRUG SCREEN 9-PANEL**

**NOW TESTING FOR
SYNTHETIC
MARIJUANA
& ALCOHOL**

EXCLUSIVE to LaneWorkSafe

The answer to Australia's workplace drug testing needs.

Accurate, Reliable, Cost Effective.

The Accurate Oral Fluid Drug Screen 9-Panel is one of the most comprehensive saliva-based drug tests available on the market, screening for a total of nine drug groups onsite. Its range of detection includes Synthetic Marijuana, Oxycodone, and Alcohol, reinforcing safety programs to uphold the highest standards and latest technologies in onsite testing.

LaneWorkSafe addresses the option for workplace use of saliva or oral fluid drug testing with an integrated, user friendly, and compliant drug test. Equipped with an enhanced mint-flavored sponge to facilitate plentiful sample collection, this device will allow for expanded testing within workplaces across Australia.

This device has been issued with a Compliance Certificate proving it meets AS/NZ 4760:2019 cut off levels and requirements.

THE FACTS: DID YOU KNOW?

- Recent research has estimated that 2.5 million days are lost annually due to drinking and drug use.
- Alcohol and other drugs cost Australian workplaces an estimated \$6 billion per year in lost productivity.
- 1 in 10 workers say they have been affected by a co-worker's use of alcohol.
- Use of Synthetic Cannabinoids has been associated with a range of adverse health effects. Including; nausea, paranoia, seizures, and in some cases death.
